WORK EXPERIENCE

Technical Consultant | Systems Ltd | Karachi, Pakistan | Mar 2023 - Present

- Provided effective leadership to a team, actively engaging in hands-on backend development and fostering a collaborative and innovative work environment, resulting in a 25% increase in team productivity.
- Collaborated seamlessly with cross-functional teams and facilitated smooth software delivery, achieving a 30% improvement in project alignment and stakeholder satisfaction.
- Conducted regular stakeholder meetings to gather and analyze requirements, translating them into actionable project tasks and ensuring alignment with business objectives, leading to a 15% reduction in project rework.
- Ensured successful project execution within specified timelines delivering high-quality results, with projects completed 20% faster than in previous cycles.
- Offered production support on an ad-hoc basis and demonstrated a high-level knowledge of the product resulting in a 50% decrease in downtime and a 20% improvement in system stability.

Software Engineer | Systems Limited | Jan 2022 - Feb 2023

- Played a pivotal role in developing and maintaining features for the Corporate Loan Origination System.
- Adhered to industry best practices and coding standards to ensure the delivery of high-quality software.
- Actively participated in Agile development methodologies, contributing to sprint planning, daily stand-ups, and retrospectives.
- Took a hands-on approach in troubleshooting and resolving production issues to ensure high system availability and performance. Implemented effective solutions to enhance the overall stability and reliability of the system.
- Collaborated seamlessly with cross-functional teams to facilitate smooth software delivery. Coordinated with quality assurance, UI/UX, and business analysis teams to ensure cohesive development processes and timely project completion.

Software Developer | Supernet E-Solutions | Karachi, Pakistan | Sep 2020 - Dec 2021

- Designed and developed robust web systems using core Java, ensuring alignment with industry best practices.
- Collaborated closely with customer user groups to incorporate their insights and preferences into the development process, resulting in user-friendly and efficient software solutions.
- Managed multiple projects concurrently, overseeing end-to-end project lifecycles to maintain high-quality deliverables. Ensured strict adherence to project timelines, optimizing team performance to achieve superior results.
- Established effective communication channels with clients to understand their requirements, address concerns, and provide regular project updates. Fostered strong client relationships by delivering high-quality products that met or exceeded expectations.
- Prioritized and managed project timelines to guarantee on-time delivery of products. Implemented efficient project management strategies to prevent delays and ensure consistent progress.

NOTABLE PROJECTS

Services Asaan

- Developed an innovative Android-based commercial application, "ServicesAsaan," available on the Google Play Store.
- Utilized Java as the primary development language and Firebase as the database, incorporating third-party libraries for advanced features and a seamless user experience.
- Implemented robust features to streamline processes for utility artisans, contributing to the digitalization of their services.

Movie Ticketing Management System

- Led the development of an efficient and user-friendly system Movie Ticketing Management System.
- Designed and implemented a data warehouse, employed PL/SQL programming, and established connectivity among three machines for seamless data sharing through shared databases.
- Utilized Java as the primary development language and Oracle 12c as the database, leveraging NetBeans 8.2 as the development tool.
